

THAR
MINES
Minerals Supplier And Exporter.

COMPANY PORTFOLIO

WHO WE ARE ?

Thar Mines is a renowned supplier and exporter of high-quality minerals that cater to various industries such as ceramics, cosmetics, electronics manufacturing units, paper, paint, pharmaceuticals, and rubber. Our diverse range of minerals includes China Clay/Kaolin, Quartz, Potassium Feldspar, Sodium Feldspar, Ball Clay, and Bentonite, available in all grades to meet the specific requirements of our clients.

WHY THAR MINES ?

Thar Mines has always been at the forefront of exploration, innovation, and evolution to continuously improve operational efficiencies and align with international standards in all its business activities and operations.

OUR PRODUCTS

CHINA CLAY / KAOLIN

We are the top most suppliers of Crude China Clay in Indian Market. We have very good quality of material in our mines with perfect chemical and physical property. We have highest natural whiteness material in our mines and proper gradation during mining activity (We never compromise in quality). Mainly, we process Crude China Clay in our washing plant to make levitated China Clay or industrial clay.

we supply all grades of china clay as per clients requirements

BALL CLAY

Thar Mines is renowned Ball clay, it is a type of sedimentary rock that is highly prized for its unique properties, making it a valuable base material in the manufacture of ceramics. It is known for its plasticity, fine particle size, and high levels of kaolinite, a type of clay mineral. Ball clay is typically found in a handful of locations around the world, making it a rare and sought-after resource for ceramic production.

SODIUM FELDSPAR

Thar Mines is renowned Sodium Feldspar products supplier in India. The Sodium Feldspar lumps, Sodium Feldspar powder we supply very good quality of material with perfect chemical and physical property. One can order quantity as per required and we will provide it with safe packaging and on-time delivery.

Sodium feldspar is a good fluxing agent due to its low silica and high alumina and alkali contents. It has wide applications in many industries for its fluxing properties.

BENTONITE

Thar Mines is renowned Bentonite products supplier in India. The Bentonite lumps, Bentonite powder we supply are 100% pure and eco-friendly. One can order quantity as per required and we will provide it with safe packaging and on-time delivery.

Bentonite is a form of highly plastic clay. Bentonite is of a great commercial importance possessing inherent bleaching properties like fuller's earth; hence, it is known as bleaching clay. Sodium bentonite is usually referred to as bentonite, whereas calcium bentonite is called Fuller's earth. Our Industrial grade Bentonite powder have excellent plasticity and lubricity, high dry-bonding strength, high shear and compressive strength, low permeability and low compressibility.

POTASSIUM FELDSPAR

Thar Mines is renowned Potassium Feldspar products supplier in India. The Potassium Feldspar lumps, Potassium Feldspar powder we supply very good quality of material with perfect chemical and physical property. One can order quantity as per required and we will provide it with safe packaging and on-time delivery.

Potassium Feldspar generally refers to a number of minerals in the Feldspar group containing Potassium. Feldspar contains a group of minerals containing potassium, sodium, calcium and aluminium silicates. Feldspar is mainly used in industrial applications for their alumina and alkali content.

QUARTZ

Thar Mines is renowned quartz products supplier in India. The Quartz lumps, Quartz powder and other Quartz products we supply are 100% pure and eco-friendly. One can order quantity as per required and we will provide it with safe packaging and on-time delivery.

Quartz is one of the hardest, yet abundantly available mineral found in earth's crust. In contrast to its ease of availability, it is quite valuable. We, At THAR MINES always try to implement best and advanced techniques to provide high quality quartz products in India.

OUR BUSINESS

- Knowing exactly what material our clients need.
- Sending sample for the purpose of testing.
- Getting the results of the sample.
- Sending quotation with competitive prices.
- Accepting and Preparing the material.
- Quality Inspection.
- Dispatching the material.
- After-sale support in case of need.

OUR CERTIFICATION

THAR
MINES
Minerals Supplier And Exporter.
